OPTIMISED FOR THE BEST OVERVIEW

The T-Series is a state-of-the-art series. It convinces with its appealing design and reliable technology. The T-Series consists of three different transmitters, which offer space for sufficient switches, pushbuttons and joysticks. All three available transmitters enable a highly intuitive handling and offer the best overview of all information of the application through their highly modern colour graphic displays (GDC 3.5 and GDC 4.3). As a matter of course, all transmitters are equipped according to the specific needs of our customers.

T3

The T3 transmitter offers unique versatility to our customers. The transmitter can be equipped according to your individual requirements choosing between key switches, toggle switches, pushbuttons and joysticks with digital or analogue functions. Additionally, the T3 transmitter provides LED indications and can be complemented with an additional graphic display to ensure a clear transmission of information.

PROTECTION CLASS:	IP 65
TEMPERATURE RANGE:	–20 to +60° C
WEIGHT:	approx. 1400g
DIMENSIONS:	220 x 140 x 150 mm
FREQUENCY RANGE:	432–481/863–930MHz; 2.4GHz
BATTERY TECHNOLOGY:	exchangeable battery, NiMH
OPERATING TIME:	up to 20 hours
